

## GLORY iV

### Glory iV Professional infrared vibrating straightener with extra-large Ceramic & Tourmaline plates

- + Infrared technology: this technology allows the rays to penetrate directly into the hair, heating the inside of the hair evenly, thus reducing the risk of damage caused by excessively high temperatures and allowing the hair to become shinier and softer.
- + Vibration: The vibration function, activated by an on-off button, facilitates the straightening movement by allowing the hair to glide more easily between the plates. It also helps to better close the hair's keratin scales for greater shine. Vibration simplifies the use of the straightener as it allows only light pressure to be applied, making it easy to use with one hand.
- + Temperature adjustment: Adjustable temperature from 150°C to 230°C via an intuitive digital display.
- + Large Ceramic and Tourmaline Plates: Wide plates allow a larger section of hair to be straightened in a single stroke. Ceramic and tourmaline are materials that distribute heat evenly and reduce the risk of damaging the hair, protecting it and reducing frizz.
- + Safety Sleep Mode: safety auto switch-off after 60 mins of non-use.
- + Rubber power cable, resistant to high temperatures.

Code	PPIAGLOXLIT032 Black
Voltage	100-240 V ~
Frequency	50-60 Hz
Wattage	66 W
Temperature	from 150 to 230 °C
Weight	320 g

Registered Design

Master carton quantity: 3 units
