X•Horizon

Some admire new horizons. We create them

X-Horizon developed from Gamma+'s idea of wanting to design a cutting-edge Made in Italy hair dryer that meets all the needs of hairdressers. Quality, design and high performance are just some of the features that describe our X-Horizon.

We chose the word Horizon because it comes from the Greek ὄρος (hóros) which translates as benchmark. And being the benchmark in the hairstyle sector is the goal we have set ourselves!
Horizon is an imaginary line that separates the sky from the earth and the sea, the ultimate limit towards which the view can be pushed, the human sense that reaches furthest. This is why X-Horizon is an ambitious and innovative project, created from our vision to go beyond the boundaries of the imaginable.

The fact that it is proudly Made in Italy underlines our dedication to quality and craftsmanship excellence. A product that goes beyond expectations, overcomes limits and opens up new possibilities in the world of hairstyling.

Are you ready to chart your own path to success in the world of hairstyling with X-Horizon?

X·HORIZON

An Italian dream.

MADE IN ITALY

X·Horizon Some admire new horizons. We create them.

- + Ion generator with on-off switch that controls the emission of negative ions depending on the result you wish to obtain on the hair.
- + G-Tron turbo 120,000 rpm digital motor that generates extreme air pressure.
- + Extraordinary filter cleaning warning system: X-Horizon has an orange LED that lights up to indicate when it is time to clean the hair dryer filter.
- + 360° 3D intake system with larger air inlet surface area for higher performance and improved pressure and flow rate by increasing output flow. The result is faster and more precise styling.
- + Special triple protection filter: designed to ensure maximum protection of the hair dryer and make daily cleaning and maintenance easier.
- + Certified bactericidal and sanitising action.
- + Quiet: reduced noise thanks to the sound-absorbing sponge of the filter and optimised, more pleasant sound frequency compared to hairdryers in the same category.
- + The LED interface clearly indicates each of the 12 combinations of heat and speed. Perfect for all hair types.
- + Proudly Made in Italy: conceived, designed and manufactured with commitment and passion by skilled hands in the Gamma+ factories in Italy.
- + Dual Ionic Technology: on-off switch that controls the emission of negative ions according to the desired result on the hair.
- + Ergonomic, futuristic design that perfectly combines light weight (290 g) and manoeuvrability while reducing arm fatigue during drying.
- + Designed to save energy: uses only the energy needed, avoiding any waste.
- + Button lock and recessed cold air blow to avoid undesired changes.

Code	gold rose PAHORIZONGE265 matt black PAHORIZONGE242
Pressure	60 mbar
Watt	1400-1600 W
Voltage	220-240 V
Weight	290 g
Noise	63,8 dB
