OXYRAY TRIO TECHNOLOGY

XCEED

Advanced professional hairdryer with triple integrated technology.

- + Three advanced technologies for a complete treatment: Active Oxygen, Infrared and Ionised Air to transform every blow-dry into a real beauty treatment. Activate them individually to meet specific needs, or in combination for a total regenerating treatment.
- + ON/OFF Active Oxygen and Infrared. LED control interface that clearly indicates each of the 12 heat and speed combinations. Perfect for all hair types.
- + 360° 3D intake system with larger air inlet surface area for higher performance and improved pressure and flow rate by increasing output flow. The result is faster and more precise styling. Special triple protection filter: designed to ensure maximum protection of the hair dryer and make daily cleaning and maintenance easier.
- + High-efficiency, extremely powerful brushless digital motor (120,000 rpm) that generates an ultra-concentrated airflow for professional performance.
- + Aerodynamic "nacelle" design inspired by aircraft engines: narrow at the rear and gently widening towards the air outlet, creating a futuristic and compact silhouette with a highly distinctive aesthetic. This design ensures a more comfortable and ergonomic grip, reducing fatigue during prolonged use. Only 300g.
- + Smart Memory function that stores the last configuration used.
- + Quiet: Reduced noise thanks to the sound-absorbing sponge filter and nacelle design that helps absorb vibrations and limit noise during airflow.
- + Designed for energy saving: uses only the energy needed, avoiding any waste.
- + Key lock system to prevent unwanted changes during use.
- + Super flexible cable guide with longer cable life.
- + 2 professional nozzles and a diffuser included.

Code	PAGAXCEEDGE
Pressure	>60 mbar
Watt	2000 W
Voltage	220-240 V
Weight	300 g
Noise	68 dB
