## Hybrid Your comfort, our technology

### Simplicity and technology.

Hybrid is the world's first hair dryer that combines the ease of use of analogue side controls with the power and precision of an intelligent digital motor. The perfect choice for those seeking a balance between tradition and innovation in hair drying. Hybrid is a name that captures the essence of this product, indicating its high quality and perfect blend of classic and cutting edge, making it the perfect tool for those looking for an advanced yet easy-to-use solution.

The word 'Hybrid' emphasises the union of two key concepts: simplicity and technology. Technology is represented by the innovative design and advanced function of the latest generation of hair dryers, while simplicity is provided by the intuitive approach and ease of use of the product thanks to the side lever controls typical of standard hair dryers, a symbol of a consolidated tradition in the world of hair drying. A balanced compromise between these two dimensions generates a unique product that offers all the efficiency of modern technology and the ease of use of classic solutions.

## HYBRID

### HYBRID

Your comfort, our technology.

- + **Digital motor 100,000 RPM:** the high-performance digital motor, with a speed of 100,000 rpm, offers exceptional power and dries hair quickly and efficiently.
- + **2 nozzles and 1 snap-on diffuser:** Hybrid comes with two nozzles of different sizes to ensure maximum styling precision for all hair types. In addition, the snap-on diffuser is ideal for defining waves or curls with ease.
- + **2 speeds and 6 temperatures:** Hybrid offers a wide range of temperature and speed combinations, allowing you to customise drying according to your needs and preferences. Thanks to the analogue side buttons that simplify selection, you can easily adjust the speed and temperature of the hair dryer for best results.
- + **Cold air shot:** the cold air function locks in the desired style, setting it and making it long-lasting.
- + **Ionic:** the built-in ionic generator emits negative ions that help reduce frizz and improve glossiness. Hair will be softer, silkier and easier to manage.
- + **3 metres of super flexible cable** for more convenient use and unprecedented freedom of movement.
